SUMMARY

Senior Educational Technology Specialist at Hepsiburada, supporting customer service teams. My focus is AI-assisted learning content production. With Claude Code, I built three tools: a workflow that turns the product team's decision trees into SCORM 2004 packages for our LMS, a video production tool that edits screen recordings and hands the edit over to Premiere Pro, and a training impact dashboard (in progress) that finds training needs in quality data. Customer service agents now use the decision trees daily during calls. I also design branching simulations in Articulate Storyline 360 and produce AI avatar training videos with HeyGen and ElevenLabs.

EXPERIENCE

Hepsiburada **06/2021 – Present**
Istanbul / Gebze, Kocaeli, Türkiye

Senior Educational Technology Specialist 07/2025 – Present

- Built a Claude Code workflow that converts the product team's Excel decision trees into SCORM 2004 packages for the e-Nocta (HepsiInstitute) LMS; about 300 customer service agents use them daily during calls.
- Developed a video production tool with Claude Code that cuts screen recordings with jump cuts, creates on-brand motion graphics and delivers an editable timeline to Premiere Pro via XML; the pilot output was a training video of about 6 minutes.
- Building a training impact dashboard that identifies training needs from quality and customer satisfaction survey data and tracks change after training (in progress).
- Designed a 4-module branching simulation series in Articulate Storyline 360 for the "Akıllı Sohbet" (Smart Conversation) call standard; about 300 to 400 employees completed module 1 and about 100 completed the crisis customer simulation, with improvement in quality scores and customer satisfaction survey results.
- As part of the series, produced the training videos watched before the simulations, including "Empathetic Listening Techniques" (Premiere Pro and HeyGen).
- Created an AI avatar onboarding video for hepsiJET with HeyGen, ElevenLabs and generative image tools; about 200 people watched it.

Quality and Training Specialist 01/2024 – 07/2025

- Maintained digital learning content for hundreds of customer service agents.
- Automated administrative tasks and exam workflows with Excel VBA macros and internal chatbots.
- Tracked completion, test scores and performance trends in the LMS and built Power BI and Excel reports for operations managers.
- Ran hands-on workshops for internal trainers on Canva and generative AI tools.

Assistant Quality and Training Specialist 10/2022 – 01/2024
HepsiFly Communication Representative 10/2021 – 10/2022
VIP and Crisis Communication Representative 06/2021 – 10/2021

ATV · Editing Director Intern **06/2015 – 07/2015**

PROJECTS

Customer Service Decision Trees · Hepsiburada
In daily use · Claude Code, Python, React, Tailwind, SCORM 2004, Git, e-Nocta

- Converts Excel and PNG decision trees from the product team into interactive HTML5 presentations and SCORM 2004 packages for the e-Nocta LMS.
- Runs on a 3-agent setup in Claude Code: 2 sub-agents (diagram reader, quality check) + a main session (orchestrator) that manages the workflow. It also has 5 custom skills, an automatic validation hook and 3 approval steps.

- The quality-check agent compares customer-facing text with the source character by character; any difference stops publishing.

Video Production Tool · Hepsiburada
Pilot · Claude Code, Python, FFmpeg, Whisper, Playwright, GSAP, Premiere Pro

- Transcribes recordings with Whisper, finds silences and retakes, and prepares a storyboard page for my review.
- Generates on-brand transitions, lower thirds and on-screen elements as transparent .mov files and delivers the edit as FCP7 XML for Premiere Pro.
- Runs fully on a company computer without admin rights, and no content leaves the machine.

Training Impact Dashboard · Hepsiburada
In progress · Claude Code, Excel automation, web dashboard

- Brings quality and customer satisfaction survey data from an automated Excel file into a web dashboard.
- 4-agent Claude Code setup: data, analysis, interface, and impact and quality check.
- Lets me start training production based on data instead of waiting for requests, and track results after training.

SKILLS

Learning design and eLearning: Learning Experience Design (LXD), instructional design, Articulate Storyline 360, SCORM 2004, scenario-based learning, branching simulations, microlearning, training needs analysis (TNA), blended learning

AI-assisted content production: Claude Code (multi-agent setups, custom skills, hooks), prompt writing (Claude, ChatGPT, Gemini), HeyGen, ElevenLabs, Midjourney, Whisper

LMS and multimedia: LMS administration (e-Nocta), video editing (Premiere Pro, After Effects, Camtasia), Canva

Automation: Python, FFmpeg, Playwright, Git, Excel VBA, workflow automation

Analytics: Power BI, advanced Excel, learning analytics, training impact tracking

Design and collaboration: Figma, Miro

EDUCATION

M.A., Public Relations and Advertising · Sakarya University **2019 – 2021**

B.A., Radio, Television and Cinema · Kocaeli University **2012 – 2017**

LANGUAGES

Turkish – Native
English – B1 (Intermediate)

VOLUNTEERING

Volunteer · TEGV (Educational Volunteers Foundation of Turkey) **02/2016 – Present**
Working with children
